HOT WATER**
At a press of button

ULTRAVIOLET (UV) TECHNOLOGY.

The UV is a proven disinfection technology used in water purification which delivers microbiologically safe water.

The germicidal lamp inside the UV emits ultraviolet energy that has the capacity to alter the nucleic acid (DNA) of viruses, bacteria and cysts so they cannot reproduce and are thereby considered inactivated.

SUPERIOR TECHNOLOGY. ADVANCED PROTECTION.

The A. O. Smith **Z1** water purifier incorporating UV purification technology produces germ-free potable water for drinking.
